EXHIBIT H

Table 4: Claims Having Original Terminology Only

Count 1	Patent (P) and Application (A) Claims
Count 1 261. A plurality of premixed aqueous compositions for forming an aqueous paint composition, the plurality of compositions comprising: a premixed pigment composition provided as an aqueous solution having an opacifying pigment; a premixed low resin composition provided as an aqueous solution having a flattening agent; and	P1/A1 P1. A set of different, but mutually compatible fluid prepaints, sufficient to form at least one paint line, which set comprises: (i) at least one opacifying prepaint comprising at least one opacifying pigment; (ii) at least one extender prepaint comprising at least one extender pigment; and (iii) at least one binder prepaint comprising
a premixed a binder composition provided as an aqueous solution having a resin; wherein mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition produces the aqueous paint composition from the premixed compositions.	at least one latex polymeric binder.
262. The plurality of premixed aqueous compositions of claim 261, wherein the number of premixed compositions is 3 or more.	P2. The set of prepaints of claim 1, wherein the number of prepaints is from 3 to 15.
263. The plurality of premixed aqueous compositions of claim 261, wherein the premixed pigment composition further comprises at least one resin adsorbed onto the opacifying pigment.	P3/A3 P3. The set of prepaints of claim 1, wherein the opacifying prepaint further comprises at least one particulate polymeric binder adsorbed onto the opacifying pigment.

Count 1	Patent (P) and Application (A) Claims
264. The plurality of premixed aqueous compositions of claim 261, wherein the premixed low resin composition further comprises at least one particulate resin absorbed onto the flattening agent.	P4/A4 P4. The set of prepaints of claim 1, wherein the extender prepaint further comprises at least one particulate polymeric binder absorbed onto the extender pigment.
265. The plurality of premixed aqueous compositions of claim 261, wherein the premixed low resin composition has a PVC of about 35% to about 100%.	P49. The set of prepaints of claim 1 wherein the extender prepaint has a PVC of about 35% to about 100%.
	P38/A44
266. An aqueous paint product made by a	P38. A paint line produced by a process which comprises the steps of:
method comprising: premixing an pigment composition as an aqueous solution having an opacifying	a. providing a set of different, but mutually compatible, fluid prepaints, which set comprises:
pigment; premixing a low resin composition as an	(i) at least one opacifying prepaint comprising at least one opacifying pigment,
aqueous solution having a flattening agent; premixing a binder composition as an	(ii) at least one extender prepaint comprising at least one extender pigment, and
aqueous solution having a resin; and mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition to produce an aqueous paint composition from the premixed compositions.	 (iii) at least one binder prepaint comprising at least one latex polymeric binder; and b. dispensing a predetermined amount of each of the prepaints into containers or applicators to form the paint line.

Count 1	Patent (P) and Application (A) Claims
267. An aqueous paint composition comprising: a premixed pigment composition as an aqueous solution having an opacifying pigment; a premixed low resin composition as an aqueous solution having a flattening agent; a premixed binder composition as an aqueous solution having a resin; and a portion of the pigment composition mixed with a portion of at least one of the low resin composition and the binder composition to produce the aqueous paint composition from the premixed compositions.	P45. A set of different, but mutually compatible, fluid prepaints sufficient to formulate at least one paint line useful for forming pigmented and clear coatings, which set comprises: (i) at least one prepaint comprising at least one opacifying pigment; and (ii) at least two prepaints each of which comprises at least one latex polymeric binder.
268. A method of forming a plurality of paint products, which method comprises the steps of: (a) providing a plurality of the premixed compositions of claim 267; and (b) dispensing a predetermined amount of each of the premixed compositions into containers to form the plurality of paint products.	P48. A method of forming at least one paint line, which method comprises the steps of: (a) providing the set of prepaints of claim 45, 46 or 47; and (b) dispensing a predetermined amount of each of the prepaints into containers or applicators to form the paint line.

Patent (P) and Application (A) Claims
P5/A5
P5. A method of forming at least one paint line, comprising the steps of:
 (a) providing a set of different, but mutually compatible, fluid prepaints, comprising: (i) at least one opacifying prepaint, comprising at least one opacifying pigment; ii) at least one extender prepaint comprising at least one extender pigment; and (iii) at least one binder prepaint comprising at least one latex polymeric binder; and (b) dispensing a predetermined amount of each of the prepaints into containers or
applicator(s) to form the paint line.
P7/A7
P7. The method of claim 5, further comprising the step of mixing the prepaint before, while, or after they are dispensed into the containers.
P8/A8
P8. The method of claim 5, further comprising the step of mixing the prepaint before or while they are dispensed into the applicator(s).

Count 2	Patent (P) and Application (A) Claims
	P9/A9
272. The method of claim 269, further comprising the step of adjusting the viscosity of the premixed compositions before, while, or after they are dispensed into the containers.	P9. The method of claim 5, further comprising the step of adjusting the viscosity of the prepaints before, while, or after they are into the containers.
	P10/A10
273. The method of claim 269, further comprising the step of adjusting the viscosity of the premixed compositions before or while they are dispensed into the containers.	P10. The method of claim 5, further comprising the step of adjusting the viscosity of the dispensed prepaints before or while they are dispensed into the applicator(s).
	P11/A11
274. The method of claim 269, further comprising the step of adding at least one additive that enhances application or final performance of the aqueous paint product.	P11. The method of claim 5, further comprising the step of adding at least one additive that enhances application or final performance of the paint .
	P13/A13
275. The method of claim 274, wherein the additive is a thickener.	P13. The method of claim 11, wherein the additive is a thickener.
	P14/A14
276. The method of claim 269, further comprising the step of adding at least one colorant to the premixed compositions .	P14. The method of claim 5, further comprising the step of adding at least one colorant to the prepaints .
	P15/A15
277. The method of claim 269, wherein the opacifying pigment composition further comprises at least one resin absorbed onto the opacifying pigment.	P15. The method of claim 5, wherein the opacifying prepaint further comprises at least one particulate polymeric binder absorbed onto the opacifying pigment.

Count 2	Patent (P) and Application (A) Claims
278. The method of claim 269, wherein the low resin composition further comprises at least one resin absorbed onto the flattening agent.	P16/A16 P16. The method of claim 5, wherein the extender prepaint further comprises at least one particulate polymeric binder absorbed onto the extender pigment
279. The method of claim 269, wherein the method is carried out at a paint manufacturing facility.	P17/A17 P17. The method of claim 5, wherein the method is carried out at a paint manufacturing facility.
280. The method of claim 269, wherein the number of premixed compositions is 4 or more.	P18/A21 P18. The method of claim 5, wherein the number of prepaints is from 4 to 15.
281. The method of claim 269, wherein the low resin composition has a PVC of about 35% to about 100%.	P50. The method of forming at least one paint line of claim 5 wherein the extender prepaint has a PVC of about 35% to about 100%.
282. The method of claim 269, wherein the method is carried out at the point-of-sale.	A18. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-sale.
283. The method of claim 269, wherein the method is carried out at the point-of-use.	A19. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-use.
284. The method of claim 269, wherein the method is controlled by a computer.	A20. The method of claim 5 or claim 6, wherein the method is controlled by a computer.

Count 2	Patent (P) and Application (A) Claims
285. A method of producing variations of a plurality of aqueous paint products, the method comprising: (i) premixing an opacifying pigment composition as an aqueous solution having an opacifying pigment; (ii) premixing a low resin composition as an aqueous solution having a flattening agent; (iii) premixing a binder composition as an aqueous solution having a resin; and (iv) premixing an additional different premixed composition from the group consisting of the compositions of (i), (ii), and (iii); and mixing a portion of the pigment composition with a portion of at least one of the low resin composition and the binder composition in containers to produce an aqueous paint product of the variations of the plurality of paint products from the premixed compositions.	P6/A6 A6. A method of forming a range of paints, the range comprising at least two paint lines, which method comprises the steps of: (a) providing a set of different, but mutually compatible, fluid prepaints sufficient to formulate at least two paint lines, which set comprises: (i) at least one opacifying prepaint comprising at least one opacifying pigment; (ii) at least one extender prepaint comprising at least one extender pigment; (iii) at least one binder prepaint comprising at least one latex polymeric binder; and (iv) at least one additional, different opacifying, extender, or binder prepaint selected from the group consisting of (i), (ii), and (iii); and (b) dispensing a predetermined amount of each of the prepaints into containers or applicator(s) to form the range of paints.
286. The method of claim 285, further comprising the step of mixing the premixed compositions before, while, or after they are dispensed into the containers.	P7/A7 A7. The method of claim 5 or claim 6, further comprising the step of mixing the prepaint before, while, or after they are dispensed into the containers.

Count 2	Patent (P) and Application (A) Claims
287. The method of claim 285, further comprising the step of mixing the premixed compositions before or while they are dispensed into the containers.	A8. The method of claim 5 or claim 6, further comprising the step of mixing the prepaint before or while they are dispensed into the applicator(s).
288. The method of claim 285, further comprising the step of adjusting the viscosity of the premixed compositions before, while, or after they are dispensed into the containers.	P9/A9 A9. The method of claim 5 or claim 6, further comprising the step of adjusting the viscosity of the prepaints before, while, or after they are into the containers.
289. The method of claim 285, further comprising the step of adjusting the viscosity of the premixed compositions before or while they are dispensed into the containers.	P10/A10 A10. The method of claim 5 or claim 6, further comprising the step of adjusting the viscosity of the dispensed prepaints before or while they are dispensed into the applicator(s).
290. The method of claim 285, further comprising the step of adding at least one additive that enhances application or final performance of the aqueous paint product.	P11/A11 A11. The method of claim 5 or claim 6, further comprising the step of adding at least one additive that enhances application or final performance of the paint .
291. The method of claim 290, wherein the additive is a thickener.	P13/A13 A13. The method of claim 11, wherein the additive is a thickener.

Count 2	Patent (P) and Application (A) Claims
292. The method of claim 285, further comprising the step of adding at least one colorant to the premixed compositions .	P14/A14 A14. The method of claim 5 or claim 6, further comprising the step of adding at least one colorant to the prepaints .
293. The method of claim 285, wherein the opacifying pigment composition further comprises at least one resin absorbed onto the opacifying pigment.	P15/A15 A15. The method of claim 5 or claim 6, wherein the opacifying prepaint further comprises at least one particulate polymeric binder absorbed onto the opacifying pigment.
294. The method of claim 285, wherein the low resin composition further comprises at least one resin absorbed onto the flattening agent.	P16/A16 A16. The method of claim 5 or claim 6, wherein the extender prepaint further comprises at least one particulate polymeric binder absorbed onto the extender pigment.
295. The method of claim 285, wherein the method is carried out at a paint manufacturing facility.	P17/A17 A17. The method of claim 5 or claim 6, wherein the method is carried out at a paint manufacturing facility.
296. The method of claim 285, wherein the number of premixed compositions is 4 or more.	P18/A21 A21. The method of claim 5 or claim 6, wherein the number of prepaints is from 4 to 15.
297. The method of claim 285, wherein the low resin composition has a PVC of about 35% to about 100%.	P50. The method of forming at least one paint line of claim 5 wherein the extender prepaint has a PVC of about 35% to about 100%.

Count 2	Patent (P) and Application (A) Claims
298. The method of claim 285, wherein the method is carried out at the point-of-sale.	A18. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-sale.
299. The method of claim 285, wherein the method is carried out at the point-of-use.	A19. The method of claim 5 or claim 6, wherein the method is carried out at a point-of-use.
300. The method of claim 285, wherein the method is controlled by a computer.	A20. The method of claim 5 or claim 6, wherein the method is controlled by a computer.

Count 3	Patent (P) and Application (A) Claims
	P19/A22
301. A premixed aqueous composition for forming an aqueous paint product, the premixed composition comprising: a premixed pigment composition provided as an aqueous solution having: an opacifying pigment; a dispersant-thickener comprising: a dispersant, a thickener; and water; wherein mixing a portion of the pigment composition with other paint ingredients provides the aqueous paint composition.	P19. A fluid opacifying prepaint useful for formulating a one pack, pigmented latex paint having a volume solids content of about 30% to about 70% and a Stormer viscosity of about 50 to about 250 KU, which prepaint contains other paint ingredients, which prepaint consists essentially of: (i) at least one opacifying pigment, (ii) at least one dispersant, (iii) at least one thickener, and (iv) water; wherein the dispersant(s) and the thickener(s) are mutually compatible with the pigment(s) and with the other paint ingredients.

Count 3	Patent (P) and Application (A) Claims
	P20/A23
302. The premixed aqueous composition of claim 301, wherein the volume solids content is about 35% to about 50% and the Stormer viscosity is about 60 to about 150 KU.	P20. The prepaint of claim 19, wherein the volume solids content is about 35% to about 50% and the Stormer viscosity is about 60 to about 150 KU.
303. The premixed aqueous composition of claim 301, wherein the opacifying pigment comprises titanium dioxide.	P24/A27 P24. The prepaint of claim 19 or 21, wherein the opacifying pigment is a material selected from the group consisting of titanium dioxide , zinc oxide, lead oxide, a synthetic polymer pigment, and mixtures thereof.
	P27/A30
304. The premixed aqueous composition of claim 301, wherein the dispersant comprises potassium tripolyphosphate.	P27. The prepaint of claim 19 or 21, wherein the dispersant is a selected from the group consisting of 2-amino-2-methyl-1-propanol; dimethylaminoethanol; potassium tripolyphosphate ; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof.

Count 3	Patent (P) and Application (A) Claims
	P28/A31
305. The premixed aqueous composition of claim 301, wherein the thickener comprises a cellulosic.	P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a titanate chelating agent, and mixtures thereof.
	P30/A34
306. The premixed aqueous composition of claim 301, further consisting essentially of at least one additive comprising a coalescent, with the additive being present in an amount of less than about 10% by weight, based on the total weight of the premixed aqueous composition.	P30. The prepaint of claim 19 or 21, further consisting essentially of at least one additive selected from the group consisting of an acid, a base, a defoamer, a coalescent , a cosolvent, a mildewcide, a biocide, and an antifreeze agent, with the additive being present in an amount of less than about 10% by weight, based on the total weight of the prepaint .

Count 3	Patent (P) and Application (A) Claims
	P32/A31
307. A plurality of different, but mutually compatible premixed aqueous compositions useful for formulating a paint product, which plurality comprises: (a) the premixed opacifying aqueous composition of claim 301; and (b) a premixed binder composition having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which binder composition consists essentially of a water-borne resin having a Tg of about -430.degree. C. to about 70.degree. C. and water;	P32. A set of two different, but mutually compatible binder prepaints useful for formulating a latex paint, which set comprises: (a) the opacifying prepaint of claim 19 or 21; and (b) a latex polymeric binder prepaint having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which prepaint consists essentially of a water-borne latex polymeric binder having a Tg of about - 430.degree. C. to about 70.degree. C. and water;
wherein the ingredients of the premixed compositions are mutually compatible with each other and with the ingredients of the other premixed compositions of the plurality.	wherein the prepaint ingredients are mutually compatible with each other and with the ingredients of the other prepaint in the set.

Count 3	Patent (P) and Application (A) Claims
	P33/A38
308. The set of premixed aqueous	P33. The set of prepaints of claim 32,
compositions of claim 307, wherein the	wherein the binder prepaint has a volume
premixed binder composition has a volume	solids content of about 30 to about 65% and a
solids content of about 30 to about 65% and a	Brookfield viscosity of about 100 to about
Brookfield viscosity of about 100 to about	50,000 centipoise at a shear rate of 1.25
50,000 centipoise at a shear rate of 1.25	reciprocal seconds, and consists essentially of
reciprocal seconds, and consists essentially of	a water-borne polymeric binder having a Tg
a water-borne resin having a Tg of about -10	of about -10 to about 60.degree. C.
to about 60.degree. C.	
	P34/A39
309. The set of premixed fluid compositions	P34. The set of prepaints of claim 32,
of claim 307, wherein the premixed binder	wherein the binder prepaint further consists
composition further consists essentially of at	essentially of at least one additive selected
least one additive comprising a coalescent,	from the group consisting of an acid, a base, a
the additive being present in an amount of	defoamer, a coalescent, a cosolvent, a
less than about 10% by weight, based on the	mildewcide, a biocide, and antifreeze agent,
total weight of the premixed binder	the additive being present in an amount of
composition.	less than about 10% by weight, based on the
	total weight of the prepaint .

Count 3	Patent (P) and Application (A) Claims
	P35/A40, A41
310. A plurality of different, but mutually compatible, premixed compositions, useful for formulating a paint product, which plurality comprises:	P35. A set of three different, but mutually compatible, fluid prepaints, useful for formulating a latex paint, which set comprises:
(a) the plurality of premixed fluid compositions of claim 307; and (b) a premixed aqueous pigment extender	(a) the set of prepaints of claim 32 wherein the extender prepaint has a volume solids content of about 30% to about 70%, a PVC of about 35% to about 100%, and a Stormer viscosity of about 50 to about 250 KU; and
composition which consists essentially of: (i) at least one flattening agent, (ii) at least one thickener,	(b) a fluid pigment extender prepaint which consists essentially of:
(iii) water, and	(i) at least one mineral extender,
(iv) optionally a resin; wherein the premixed extender composition	(ii) at least one thickener,
has a volume solids content of about 30% to about 70%, a PVC of about 35% to about	(iii) water, and
100%, and a Stormer viscosity of about 50 to about 250 KU.	(iv) optionally a polymeric binder.

311. The plurality of premixed compositions of claim 310, wherein the premixed extender composition has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.	P36/A42 P36. The set of prepaints of claim 35, wherein the extender prepaint has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.
compositions of claim 310, wherein the premixed extender composition has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.	wherein the extender prepaint has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150
compositions of claim 310, wherein the premixed extender composition has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.	wherein the extender prepaint has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150
premixed extender composition has a volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.	solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150
volume solids content of about 35% to about 65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.	PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150
65%, a PVC of about 40% to about 100% and a Stormer viscosity of about 60 to about 150 KU.	Stormer viscosity of about 60 to about 150
a Stormer viscosity of about 60 to about 150 KU.	
KU.	KU.
1	P37/A43
312. The plurality of premixed	P37. The set of prepaints of claim 32,
compositions of claim 307, wherein the	wherein the extender prepaint further
premixed binder composition further	consists essentially of at least one additive
consists essentially of at least one additive	selected from the group consisting of an acid,
comprising a coalescent, with the additive	a base, a defoamer, a coalescent, a cosolvent,
being present in an amount of less than about	a mildewcide, a biocide and an antifreeze
20% by weight, based on the total weight of	agent with the additive being present in an
the binder composition.	amount of less than about 20% by weight,
l t	based on the total weight of prepaint.

Count 3	Patent (P) and Application (A) Claims
	P21/A24
313. A premixed aqueous pigment paint	P21. A fluid white opacifying prepaint
composition having a volume solids content	having a volume solids content of about 30%
of about 30% to about 70%, a PVC of about	to about 70%, a PVC of about 35% to about
35% to about 100%, and a Stormer viscosity	100%, and a Stormer viscosity of about 50 to
of about 50 to about 250 KU, useful for	about 250 KU, useful for formulating a one
formulating an aqueous pigmented paint	pack, pigmented latex paint containing other
product containing other paint ingredients,	paint ingredients, which prepaint consists
the premixed pigment composition provided	essentially of:
as an aqueous solution comprising:	
a pigment;	(i) at least one opacifying pigment,
a dispersant-thickener comprising:	(ii) at least one dispersant,
a dispersant, and	·
a thickener;	(iii) at least one thickener,
a thickener,	
a resin, and	(iv) at least one film-forming or non-film-
water;	forming polymer , and
water,	
wherein mixing a portion of the pigment	(v) water; wherein the dispersant(s), the
composition with the other paint ingredients	thickener(s), and the polymer(s) are
provides the aqueous paint product.	compatible with the pigment(s) and with the
10	other paint ingredients and wherein the
	prepaint is stable to sedimentation.

Count 3	Patent (P) and Application (A) Claims
	P22/A25
314. The premixed aqueous composition of	P22. The prepaint of claim 21, wherein the
claim 313, wherein the volume solids content	volume solids content is about 35% to about
is about 35% to about 50%, the PVC is about	50%, the PVC is about 50 to about 100%, and
50 to about 100%, and the Stormer viscosity	the Stormer viscosity is about 60 to about 150
is about 60 to about 150 KU.	KU.
	P23/A26
315. The premixed aqueous composition of claim 313, wherein the resin is adsorbed onto the pigment.	P23. The prepaint of claim 21, wherein the polymer is adsorbed onto the opacifying pigment.
	P24/A27
316. The premixed aqueous composition of claim 313, wherein the pigment comprises titanium dioxide.	P24. The prepaint of claim 19 or 21, wherein the opacifying pigment is a material selected from the group consisting of titanium dioxide, zinc oxide, lead oxide, a synthetic polymer pigment, and mixtures thereof.

the dispersant is a selected from the group consisting of 2-amino-2-methyl-1-propanol; dimethylaminoethanol; potassium tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The premixed aqueous composition of claim 19 or 21, wherein the thickener comprises a the dispersant is a selected from the group	Count 3	Patent (P) and Application (A) Claims
the dispersant is a selected from the group consisting of 2-amino-2-methyl-1-propanol; dimethylaminoethanol; potassium tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		P27/A30

P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		
consisting of 2-amino-2-methyl-1-propanol; dimethylaminoethanol; potassium tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The prepaint of claim 19 or 21, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	317. The premixed aqueous composition of	P27. The prepaint of claim 19 or 21, wherein
dimethylaminoethanol; potassium tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali- swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically- modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically- modified cellulosic, a hydrophobically- modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	claim 313, wherein the dispersant comprises	the dispersant is a selected from the group
tripolyphosphate; trisodium polyphosphate; citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	potassium tripolyphosphate.	consisting of 2-amino-2-methyl-1-propanol;
citric acid; polyacrylic acid; diolefin/maleic anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The prepaint of claim 19 or 21, wherein the thickener comprises a rellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		dimethylaminoethanol; potassium
anhydride adducts; hydrophobically-modified polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		tripolyphosphate; trisodium polyphosphate;
polyacrylic acid, hydrophilically-modified polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		citric acid; polyacrylic acid; diolefin/maleic
polyacrylic acid, and salts thereof; and mixtures thereof. P28/A31 P28. The prepaint of claim 19 or 21, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkaliswellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		anhydride adducts; hydrophobically-modified
P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		polyacrylic acid, hydrophilically-modified
P28/A31 P28. The premixed aqueous composition of claim 313, wherein the thickener comprises a the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic , a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		polyacrylic acid, and salts thereof; and
P28. The prepaint of claim 19 or 21, wherein the thickener comprises a the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkaliswellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		mixtures thereof.
P28. The prepaint of claim 19 or 21, wherein the thickener comprises a the thickener comprises a cellulosic. P28. The prepaint of claim 19 or 21, wherein the thickener is a selected from the group consisting of an alkali-soluble or alkaliswellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		
the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		P28/A31
the thickener is a selected from the group consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		
consisting of an alkali-soluble or alkali-swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	318. The premixed aqueous composition of	P28. The prepaint of claim 19 or 21, wherein
swellable emulstion (ASE), a hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically- modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically- modified cellulosic, a hydrophobically- modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	claim 313, wherein the thickener comprises a	the thickener is a selected from the group
hydrophobically-modified, alkali-soluble emulstion (HASE), a hydrophobically-modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	cellulosic.	consisting of an alkali-soluble or alkali-
emulstion (HASE), a hydrophobically- modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically- modified cellulosic, a hydrophobically- modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a	·	swellable emulstion (ASE), a
modified ethylene oxide-urethane polymer (HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		hydrophobically-modified, alkali-soluble
(HEUR), a cellulosic, a hydrophobically-modified cellulosic, a hydrophobically-modified polyacrylamide, a polyvinyl alcohol, a fumed silica, an attapulgite clay, a		emulstion (HASE), a hydrophobically-

		titanate chelating agent, and mixtures thereof.

Count 3	Patent (P) and Application (A) Claims
	P29/A32, A33
319. The premixed aqueous composition of	P29. The prepaint of claim 21, wherein the
claim 313, wherein the resin comprises	polymer is selected from the group consisting
acrylics.	of acrylic, polyvinyl acetate, styrene-acrylic,
	styrene-butadiene, vinyl acetate-acrylic,
	ethylene-vinyl acetate, vinyl acetate-vinyl
	versatate, vinyl acetate-vinyl maleate, vinyl
	acetate-vinyl chloride-acrylic, ethylene-vinyl
	acetate-acrylic polymers and mixtures thereof
	and wherein the polymer further comprises up
	to about 10% by weight of the polymer of a
	monomer selected from the group consisting
	of a functional monomer, a co-monomer, and
	combinations thereof.
	P30/A34
320. The premixed aqueous composition of	P30. The prepaint of claim 19 or 21, further
claim 313, further consisting essentially of at	consisting essentially of at least one additive
least one additive comprising a coalescent,	selected from the group consisting of an acid,
with the additive being present in an amount	a base, a defoamer, a coalescent, a cosolvent,
of less than about 10% by weight, based on	a mildewcide, a biocide, and an antifreeze
the total weight of the premixed aqueous	agent, with the additive being present in an
composition.	amount of less than about 10% by weight,
	based on the total weight of the prepaint.

Count 3	Patent (P) and Application (A) Claims
	P32/A37
321. A plurality of different, but mutually compatible premixed aqueous compositions useful for formulating a paint product, which plurality comprises: (a) the premixed aqueous composition of	P32. A set of two different, but mutually compatible binder prepaints useful for formulating a latex paint, which set comprises: (a) the opacifying prepaint of claim 19 or
claim 313; and	21; and
(b) a premixed binder composition having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which binder composition consists essentially of a waterborne resin having a Tg of about -430.degree. C. to about 70.degree. C. and water;	(b) a latex polymeric binder prepaint having volume solids content of about 25% to about 70% or a Brookfield viscosity of less than about 100,000 centipoise at a shear rate of 1.25 reciprocal seconds, which prepaint consists essentially of a water-borne latex polymeric binder having a Tg of about - 430.degree. C. to about 70.degree. C. and water;
wherein the ingredients of the premixed compositions are mutually compatible with each other and with the ingredients of the other premixed compositions in the plurality .	wherein the prepaint ingredients are mutually compatible with each other and with the ingredients of the other prepaint in the set.

Count 3	Patent (P) and Application (A) Claims
	P33/A38
322. The plurality of premixed aqueous	P33. The set of prepaints of claim 32,
compositions of claim 321, wherein the	wherein the binder prepaint has a volume
premixed binder composition has a volume	solids content of about 30 to about 65% and a
solids content of about 30 to about 65% and a	Brookfield viscosity of about 100 to about
Brookfield viscosity of about 100 to about	50,000 centipoise at a shear rate of 1.25
50,000 centipoise at a shear rate of 1.25	reciprocal seconds, and consists essentially of
reciprocal seconds, and consists essentially of	a water-borne polymeric binder having a Tg
a water-borne resin having a Tg of about -10	of about -10 to about 60.degree. C.
to about 60.degree. C.	
	P34/A39
323. The plurality of premixed aqueous	P34. The set of prepaints of claim 32,
compositions of claim 322, wherein the	wherein the binder prepaint further consists
premixed binder composition further	essentially of at least one additive selected
consists essentially of at least one additive	from the group consisting of an acid, a base, a
comprising a coalescent, the additive being	defoamer, a coalescent, a cosolvent, a
present in an amount of less than about 10%	mildewcide, a biocide, and antifreeze agent,
by weight, based on the total weight of the	the additive being present in an amount of
premixed binder composition.	less than about 10% by weight, based on the
	total weight of the prepaint.

Count 3	Patent (P) and Application (A) Claims
	P35/A40, A41
324. A plurality of different, but mutually compatible, premixed aqueous	P35. A set of three different, but mutually compatible, fluid prepaints, useful for
compositions, useful for formulating an	formulating a latex paint, which set
aqueous paint product, which plurality comprises:	comprises:
(a) the plurality of premixed aqueous compositions of claim 322; and	(a) the set of prepaints of claim 32 wherein the extender prepaint has a volume solids content of about 30% to about 70%, a PVC of
(b) a premixed aqueous pigment extender	about 35% to about 100%, and a Stormer
composition which consists essentially of:	viscosity of about 50 to about 250 KU; and
(i) at least one flattening agent,	
(ii) at least one thickener,	(b) a fluid pigment extender prepaint which consists essentially of:
(iii) water, and	
(iv) optionally a resin;	(i) at least one mineral extender,
wherein the premixed binder composition	(ii) at least one thickener,
has a volume solids content of about 30% to	
about 70%, a PVC of about 35% to about	(iii) water, and
100%, and a Stormer viscosity of about 50 to	
about 250 KU.	(iv) optionally a polymeric binder .

Count 3	Patent (P) and Application (A) Claims
	P36/A42
325. The plurality of premixed aqueous	P36. The set of prepaints of claim 35,
compositions of claim 324, wherein the	wherein the extender prepaint has a volume
premixed extender composition has a	solids content of about 35% to about 65%, a
volume solids content of about 35% to about	PVC of about 40% to about 100% and a
65%, a PVC of about 40% to about 100% and	Stormer viscosity of about 60 to about 150
a Stormer viscosity of about 60 to about 150	KU.
KU.	
	P37/A43
326. The plurality of premixed aqueous	P37. The set of prepaints of claim 32,
compositions of claim 321, wherein the	wherein the extender prepaint further
premixed binder composition further	consists essentially of at least one additive
consists essentially of at least one additive	selected from the group consisting of an acid,
comprising a coalescent, with the additive	a base, a defoamer, a coalescent, a cosolvent,
being present in an amount of less than about	a mildewcide, a biocide and an antifreeze
20% by weight, based on the total weight of	agent with the additive being present in an
the premixed binder composition.	amount of less than about 20% by weight,
	based on the total weight of prepaint.

Count 4	Patent (P) and Application (A) Claims
	P31/A35, A36
327. An aqueous solution having a	P31. A fluid pigment extender prepaint,
premixed pigment extender composition,	useful for formulating a one pack, pigmented
useful for producing a paint product	latex paint containing other paint ingredients,
containing other premixed compositions, the	which prepaint consists essentially of
aqueous solution comprising:	
	(i) at least one mineral extender having a
(i) a flattening agent;	volume solids content of about 30% to about
	70%, a PVC of about 35% to about 100%,
(ii) a dispersant thickening dilutant	and a Stormer viscosity of about 50 to about
composition having a	250 KU;
thickener,	
	(ii) at least one thickener,
(iii) water, and	
	(iii) water, and
(iv) optionally a resin; wherein the	
premixed extender	(iv) an optional polymeric binder; wherein
composition ingredients are	the prepaint ingredients are compatible with
compatible with each other.	each other and with the ingredients of the
	paint.
